

18582 Screw conveyor for high temp ash

Specifications

Additional Information:

18582 Screw conveyor for high temp ash

Short Description

18582 Screw conveyors for high temp ash – Complete transport system from burner to outside collection

Features:

- Working temperature up to 600 degree C.
- Design made so the screw rotor can move 35 mm in axial direction due to the temperature changes
- Manufactured in heat resistant carbon steel
- Special coupling design between gear motor and screw rotor to avoid heat transfer
- Paint in heat proof paint according to customer specifications
