

23691 Pallet crusher/Pallet shredder

Specifications

Additional Information:

Product type:	Process equipment, Screw conveyor
Industry:	Recycling, Waste handling
Transported material:	Biomass, Gypsum
Applied steel in product:	Carbon steel, Hardox plate
Surface treatment:	Carbon steel – primed

Short Description

23691 Pallet crusher/Pallet shredder:

- Designed for crushing of wood pallets
- Part of a complete system for manufacturing wood bricks/wood blocks
- Capacity is 70-100 pallets pr. hour
- The machine has outlet in the end for further processing
- The crushing principle is very plain and the machine is easy to operate

Manufacturing details

- Manufactured in carbon steel and painted according to customer specifications
- The screw rotor is partly manufactured in Hardox-450 steel
- Chain drive in the drive end to save space
