

18344 Granules conveyor system

Specifications

Additional Information:

House:	Bin
Applied steel in product:	Carbon steel, Hardox plate
Product type:	Screw conveyor, Silo / bin
Surface treatment:	Carbon steel – painted
Transported material:	Insulation, Minerals

18344 Granules conveyor system

Short Description

18344 – Granules conveyor system

Complete transportation system with screw conveyors. Including buffer shutes and support structures.

The transportsystem is designed for rockwool granules. All capacity calculations are made by BEMA's engineering department.

The transportation system is delivered with a complete documentation package. Assembled and tested before delivery.

Features:

- Designed to fill rockwool bags – short filling time, which required buffer capacity
- Wearproven HARDOX flights – abrasive material
- Screws supplied with turning sensors
- Custom designed screw conveyors due to limited physical space
- The complete system is delivered with a risk analysis from BEMA's engineering department for easy CE-approval by the end customer
- Manufactured in carbon steel. Screw flights in HARDOX steel
