

20111 Turnable cutting screw

Specifications

Additional Information:

Product type:	Process equipment, Screw conveyor
Industry:	Offshore
Transported material:	Bulk material
Applied steel in product:	Stainless steel
Surface treatment:	Stainless steel – acid pickled

20111 Turnable cutting screw

Short Description

20111 Turnable Screw Conveyor Ø350x10000mm

For transport of drill cuttings

Features:

- Turnable in an angle of 25°. The screw is easily turned with a hand wheel connected to a manual gear box
 - Turnable point under the inlet carrying the screw
 - The screw conveyor is manufactured with a self supporting beam ensuring a free span of app. 5 meter
 - Screw rotors with HARDUX flights (wear proven)
 - Flexible intermediate bearings to ensure a long life time
 - Customer design to fit into the drilling rig
 - Housing and casings manufactured in stainless steel – 1.4401
- Supplied with full documentation according to NORSOK standards.
