33962 - Screw conveyors for transport of wood chips, including on site montage after shipment

Short Description

33962 – Screw conveyors for transport of wood chips, including on site montage after shipment
This build are made with thight restrictions on the dimesnsions, due to very limited space on site
BEMA handle all design, manufacturing and the actual installation on site in communication with customer. The installation on site are handled from 2 of our employees in one week.
If you have a project, that involves limited installation space, then feel free to contact BEMA A/S for a dialouge and solution. We are experienced in such kind of work and can even take the task of measuring your factory layout our self, with our special 3D scanner – find contact info on our website and give us a call.
