

18971 Screw conveyor for drill cuttings

Specifications

Additional Information:

Product type:	Screw conveyor
Industry:	Offshore
Transported material:	Bulk material
Applied steel in product:	Stainless steel
Surface treatment:	Stainless steel – acid pickled

Short Description

18971 Screw conveyor Ø350×27900 mm

For transport of drill cuttings

Features:

- Well proven construction
- The gearmotor is separated to the screw rotors via a gear due to tight dimensions on the drilling rig
- Screw rotors with HARDOX flights (wear proven)
- Flexible intermediate bearings to ensure a long life time
- Customer design to fit into the drilling rig
- Housing and casings manufactured in stainless steel – 1.4401
