

22235 Swing gate bin

Specifications

Additional Information:

Product type:	Process equipment
Industry:	Insulation
Transported material:	Insulation
Applied steel in product:	Carbon steel, Stainless steel
Surface treatment:	Carbon steel – painted

22235 Swing gate bin

Short Description

22235 Swing gate bin for heavy abrasive material

Features:

- The gate is manufactured as a swing gate to avoid material contact with the bearings
- Wear resistant plate in the bottom to increase the life time
- Supplied with a filling gauge
- Easy to maintain mechanical opening/closing mechanism.
- Encapsulated – no possibility to come into contact with moving parts
- Ideal for combination with weighing cells. When the gate opens, the media falls out as a batch

Manufacturing details

- Manufactured in carbon steel
- Surface treatment – painted according to customer specifications
- Manufactured on a frame for easy installation on-site
- All driving parts are very easy to maintain. Everything can be serviced by normal skilled technicians. No need for specialists!
