

18962 Cutting screw - with turning screw implemented

Specifications

Additional Information:

Product type:	Screw conveyer
Industry:	Offshore
Transported material:	Bulk material
Applied steel in product:	Stainless steel
Surface treatment:	Stainless steel – acid pickled

18962 Cutting screw - with turning screw implemented

Short Description

18962 Double cutting screw conveyors

- Complete transportation system for cuttings
- Double screw to secure operating security off-shore
- The lifting screws are supplied with a turning screw for flexible outlet
- The lifting screw is carried in 1 point. Therefore a structural girder has been made to carry the screw

Features:

- The screws are driven by hydraulic motors
- Complete testrun has been done in the factory including test of the control system and electrical wiring
- The screws are manufactured in carbon steel, and the screw flights in Hardox steel
- All housing are manufactured in stainless steel 1.4401 (AISI-316)
- Motors are painted in according to NORSOK specifications
- The system is delivered with complete documentation on design, manufacturing and testing
