DECEMBER 2018

NEWS FROM BEMA

In 2018, BEMA continued the exciting journey begun many years ago and which has gathered momentum in recent years. In 2017, we acquired the company ACTA Recycling and, in the autumn of 2018, the opportunity arose to acquire Ferreo A/S. Ferreo specialises in the production of stainless-steel process equipment. We have now moved everything to our address in Haderslev. Read more about Ferreo in this newsletter and how the acquisition will benefit you as a BEMA customer.

In January, we will update our website www.bema.as and you can read about Ferreo and the new opportunities the acquisition opens up for both you and us.

We were very pleased to meet so many of our customers and potential customers at the 2018 trade fairs where we were represented in both Denmark and Sweden. We greatly value a direct dialogue with our customers, collaboration partners, and others at these fairs.

We would like to wish all our customers and collaboration partners a merry Christmas and a happy New Year. We look forward to seeing you again in the new year.

BEMA HAS ACQUIRED FERREO A/S

BEMA has taken over all the activities of the engineering plant Ferreo A/S, formerly domiciled in Bjert near Kolding. The production has now moved to BEMA's address in Haderslev. Quite a few members of staff have made the move, too. Legally, the acquisition took effect on 12 November.

'With this acquisition, we'll be able to exploit our production facilities in Haderslev in the best possible way and the skilled staff at BEMA and Ferreo, respectively, supplement each other perfectly, enabling us to handle the entire range of tasks. Further, we'll be able to consolidate the combined production flow and exploit the management tools better for the benefit of our customers', says Jørgen Strøm, CEO, BEMA A/S.

BEMA A/S is ISO-9001 certified, for example, and Ferreo will also be working according to this standard.

The acquisition will facilitate new product areas and our respective expertise creates new synergies. Further, the acquisition of Ferreo will mean the establishment of a wholly new production line earmarked for stainless steel solutions.

This includes supplying process equipment to the industry based on a six-phase model known as Steel Performance. All products are customised and developed in close dialogue with customers. The product range is very extensive and includes both classic products such as tanks, evaporators, and heat exchangers as well as specialised solutions, including fluid bed and flash dryer systems, cyclones, and pressurised tanks.

In this context, BEMA will be able to supply stainless steel components to the above types of plant. From the new year 2018/19, an independent stainless-steel production will be up and running at BEMA. We are certified according to the EU Regulation 1935/2004 production framework and we are able, therefore, to offer our process and foodstuff customers complete and traceable solutions.

Development, construction, and manufacture of conveyor components, screw loaders, and screw loader solutions continue as before.

REMEMBER

- BEMA can supply any kind of spiral or screw flight, including conical ones.
- We also supply all types of screw shafts, and we're one of the leaders in screw conveyors manufactured for any purpose.
- We deliver everything according to client specifications. We manufacture items to order, providing full customer satisfaction, and we always have reserve parts in stock.
- We stand ready to assist you if you experience operating difficulties. Contact us, and we'll tackle the job with our highly flexible approach.
- BEMA has its own design and fabrication departments, and we handle every stage of the production process in house. You will find us a highly competent partner.

All this ensures that BEMA is able to solve all conveying requirements using screw loaders, from the initial idea to the finished result.

BEMA's R & D and production departments are located in Haderslev, which means that we can work closely with you – from the time your specific solution is on the drawing board until it is produced – also if things become critical!

Merry Christmas and Happy New Year!

We've also entered the holiday season, and we'd like to take this opportunity to wish all our customers, suppliers and partners a very merry Christmas and a happy new year. We look forward to creating more exciting projects and growth with you in 2019.
